

Services: Design Planning, Survey, Wetlands Delineation, Municipal, State and Federal Permitting Assistance, Construction Observation

Location: Gorham, New Hampshire

Project Summary: Berlin City Chevrolet Buick, Inc. required civil engineering services as part of the new addition for the service reception area at their Chevrolet dealership on Route 16 in Gorham, New Hampshire. The new addition is approximately 65 feet long by 25 feet wide. The project included new curbing and vehicle travel lanes near the new addition, as well as revised curbing and parking along the north and east sides of the existing show room.

Final design plans and the preparation of full contract documents suitable for site plan review, contractor bidding, and project construction, as well as construction services for bidding, shop drawing review, and part time resident observation services were all included.
