

Geologist/ Environmental Engineering Project Manager

Horizons Engineering, Inc., a multi-disciplinary civil and environmental engineering, water resource consulting, and land surveying firm, has an immediate opening for a project manager in our environmental group. The ideal candidate would have experience completing and managing a wide variety of drinking water resource and contaminated site projects. Responsibilities will include management of members of our technical team, technical project management, client coordination, and budget management. We are looking for an enthusiastic, hardworking, and talented individual to become part of our close-knit team. The position has excellent career growth potential and will be under the mentoring and guidance of our experienced management team. The position can be based out of any of our outstanding Northern New England office locations including:

New Hampshire:

Littleton
New London
Ossipee
Conway
Newmarket

Vermont:

Sharon
Newport

Maine:

Saco

The individual would be expected to have qualifications to manage and complete all aspects of water resource permitting and contaminated site characterization and remediation projects. These may include:

- bedrock and overburden water supply exploration, development, and permitting;
- contaminated site characterization, including soil and groundwater sampling;
- contaminated site remedial action planning and implementation;
- completion of phase I and II environmental site assessments;
- above and underground storage tank decommissioning; and
- a wide variety of other subsurface and hydrogeologic characterization projects.

Benefits of the position include:

- Competitive salary and medical benefits;
- Sign on bonus and company bonus incentives;
- Paid vacation and sick time;
- Company 401k with contribution matching;
- Continuing education and licensure support;
- Annual company clothing allowance;
- Partial work at home options; and
- Supportive work environment with ample opportunity for career advancement.

Our staff at Horizons Engineering, Inc. is a close-knit group of hard-working individuals that value service to our clients, design innovation, and a no-nonsense approach. We're looking for a strong work ethic, a desire to learn, and interest in working on a wide range of engineering and environmental projects throughout Vermont, New Hampshire, and Maine.

Specific requirements of the position include:

- Bachelor's degree or higher in Geology or a related discipline from an accredited institution; Master's Degree preferred;
- New Hampshire Professional Geologist or Engineer's License, or ability to obtain licensure within 6 months of starting;
- Strong problem-solving and field skills, mechanical knowledge a plus;
- Competent with Microsoft Excel and Word;
- Ability to complete field work including lifting up to 40 lbs., walking undeveloped sites, with occasional field days requiring several miles of hiking;
- Experience with AutoCAD design software including Civil3D a plus; and
- Desire to work hard, learn, and successfully face new challenges!

Interested Candidates should forward a resume and cover letter to:
