

Horizons Engineering has an immediate opening for an experienced Professional/Licensed Land Surveyor to support our growing team. You could be working with a dedicated and diverse group of licensed land surveyors, civil engineers, geologists, and other technicians on a variety of residential and commercial boundary surveys as well as residential, commercial, resort, institutional, and energy projects throughout northern New England. **This position may report to any of our 9 office locations.**

Our staff at Horizons is a close-knit group of hard-working individuals who value client service and design innovation. We encourage our employees to cultivate a high level of collaborative thinking through a laid-back and flexible work environment, and we offer our team members higher than industry standard pay, outstanding benefits, and opportunities for growth through continuing education and career advancement.

Essential Job Duties:

- Performing conventional and GPS computations and analysis;
- Land records research;
- Field crew supervision;
- Ability to take field measurements and stakeout of survey projects in Horizons' areas of operation;
- Make boundary decisions based on Colonial Land reconstruction theories;
- Prepare and seal final surveys for boundary, subdivision, site plan etc.;
- Prepare engineering basemaps for civil and structural design projects;
- Communicate with architects, engineers, geologists, etc. in a collaborative effort; and
- Coordinate with Principal Surveyor for evaluation of staffing, equipment, project, and marketing efforts.

Skills and Qualifications:

- High School Graduate and Associates Degree or 5-10 years' experience preferred;
- NH Survey License or ability to obtain a NH licensure within 6 months required, individuals holding licenses in Maine and/or Massachusetts would be preferred.
- 5-10 years of professional experience in the practice of land surveying in northern New England or a similar setting;
- Ability to manage projects and handle client relations;
- Ability to lift 50 pounds;
- Ability to complete field work including carrying equipment, cutting traverse lines, and walk undeveloped sites;
- Ability to work outdoors in various weather conditions;
- Experience with AutoCAD design software including Civil3D a plus; and
- Strong technical skills.

Benefits:

- Competitive salary and outstanding benefits including health, dental, and life;
- Paid holidays, vacation and sick time;
- Company 401k with partial match;
- Paid professional association membership and continuing education; and
- Supportive work environment with ample opportunity for career advancement
- ***\$15k signing bonus after 9 months of successful employment**

Interested candidates should forward a cover letter and resume to:
